

CTENOPHORE *Mnemiopsis leidyi* (A.Agassiz) IN THE AZOV AND BLACK SEAS: ITS BIOLOGY AND CONSEQUENCES OF ITS INTRUSION

CONTENTS

Introduction
S.P. Volovik

Introduction
S.P. Volovik

Chapter 1. Ctenophore *Mnemiopsis leidyi* in its native area (a short review)
G.S. Volovik and S.P. Volovik

Chapter 2. Ctenophore *Mnemiopsis Leidyi* (A. Agassiz) in the Black Sea

2.1. Some results of studying the intruder *Mnemiopsis Leidyi* (A. Agassiz) in the Black Sea
T.L. Shiganova

2.2. The effect of ctenophore on the ichthyoplankton in the north-eastern part of the Black Sea
V.P. Nadolinski

Chapter 3. Ctenophore *Mnemiopsis leidyi* in the Azov Sea

3.1. Main parameters of the regime of the Azov Sea in the periods before and after the intrusion of ctenophore
G.S. Volovik and S.P. Volovik

3.2. Biology of ctenophore *Mnemiopsis leidyi* in the Azov Sea
Z.A. Mirzoyan, G.G. Kornienko, S.I. Dudkin and T.V. Lozhichevskaya

Chapter 4. Relationships between *Mnemiopsis* and the Azov Sea ecosystem and assessment of the consequences of ctenophore intrusion

4.1. Specificities of the hydrochemical regime and production of the primary organic matter in the ecosystem in the present-day period
Z.V. Aleksandrova, T.G. Baskakova and M.G. Romova

4.2. Development of the bacterial community in the period of ctenophore's intrusion
L.I. Tolokonnikova

4.3. Changes in the structure and productivity of the zooplankton community after the appearance of ctenophore
Z.A. Mirzoyan

4.4. Estimation of the effect of ctenophore on the bottom biocenoses
E.I. Studenikina and L.N. Frolenko

4.5. Estimation of the changes in the Azov Sea ichthyoplankton under the influence of ctenophore
V .P. Nadolinski

4.6. Biology and adaptation of anchovy and tyulka vis-a-vis the intrusion of ctenophore
S.F. Rogov, G.I. Lutz, S.P. Volovik

Chapter 5. Simulation of relationships between ctenophore and biota of the ecosystem

5.1. Simulation system "Ctenophore in the Azov Sea" and mathematical models
G.S. Volovik

5.2. Expert-informational system "Azov" as a means for estimation of the situation and predictions

L.Yu. Zhilyakova, S.V. Kozlitina and I.P. Selivanov

5.3. Mathematical simulation of the spatio-temporal dynamics of the *Mnemiopsis leidyi* population in the Black and Azov Seas

S.V. Berdnikov, J.F. Caddy, V. Hull and V.V. Selyutin

Chapter 6. On the biocontrol possibilities concerning the development of the intruder's population

6.1. Substantiation of the biocontrol measures against the development of the *Mnemiopsis* population in the Azov and Black Sea Basin

G.R. Harbison and S.P. Volovik

6.2. A new invader *Beroe ovata* and its effect on the ecosystem of the Azov and Black Sea Basin in August-September of 1999

T.A. Shiganova, Yu.V. Bulgakova, S.P. Volovik, Z.A. Mirzoyan and S.I. Dudkin

Conclusion
